

10 Gallon Portable Fog Unit with 2 Fog Nozzles

This portable fog unit operates on compressed air and utilizes an air operated pump. Compressed air and pressurized solution are fed to each tip to produce high fog volume with droplet size from 13 to 16 micron.

Specification:

- 2 fog nozzles projecting up to 10 feet
- droplet size from 10 to 15 micron
- runs on compressed air
- 10 gallon pre-mix tank
- flow rate is up to 16 oz. per minute at 50 PSI
- Santoprene Pump

- Dimension: 20 x 18 x 44 inches
- Gross Weight: 33 pounds

10 Gallon Portable 3 Fog Unit with Telescoping Pole

The Fog-It 10 is a 10 gallon portable fog unit that runs on compressed air. The air runs to the fog nozzles creating a dense fog where the solution is atomized.

- 10 gallon tank capacity
- 360 degree fog pattern
- 3 nozzle system
- adjustable telescoping pole from 4 to 8 feet
- flow rate is up to 16 oz. per minute at 50 PSI
- Santoprene pump

- Dimensions: 20 x 18 x 44 inches
- Gross Weight: 46 pounds
